

Transportation

Because Los Banos is so centrally located, it is very easy to get here. We are located on Highway 152 between I-5 to the west and Highway 99 to the East, if you are driving. We are approximately 2 hours south of San Francisco and Sacramento, 1 hour east of Monterey and 1 1/2 hours north-west of Fresno. We are the perfect stopping point if you are traveling from Southern California or heading to Yosemite or the Coast.

The Los Banos Municipal Airport provides easy access and can accommodate up to small jets. This is an instrument rated airport and is open 24 hours a day, seven days a week. In addition, there is also a helipad to allow helicopters to land as well. There is a Pilots Lounge that is open 24/7 with comfortable seating, restroom facilities, a desk for doing paperwork as well as a microwave and small re-

frigerator.

Equally important is the close proximity to shopping, restaurants and entertainment which is within walking distance from the airport. One of our major shopping centers is just across the road and features a restaurant, fast food, grocery store, department store, theater and other retail outlets.

Another alternative means of travel is Greyhound Bus. The Los Banos station is conveniently located in the Downtown Business District and is within easy walking distance to shopping, dining and entertainment. Currently there are four buses that arrive and depart daily from the Los Banos Greyhound Bus station. A small restaurant and store is currently being planned for passengers.

While visiting in town additional transportation is available through local taxi companies, rental cars, city bus service and private transportation services.

Monterey

Welcome To
